Education

Vellore Institute of Technology, Chennai

Bachelor of Technology in Computer Science with specialization in Artificial Intelligence

2023 – 2027

CGPA: 8.71

Narayana Junior College, Hyderabad

Telangana Board of Intermediate Education

2021 2023

Percentage: 96%

Gowtham Model School, Hyderabad

Telangana Board of Secondary Education, Grade 10

2020 2021

CGPA: 10

Experience

Machine Learning Intern

Jul 2025 – Aug 2025

Coincent.ai

- Worked on an Object Detection project using TensorFlow to identify and classify objects from images, improving automated visual recognition capabilities.
- Developed a Vision Transformer (ViT) model for image classification, leveraging transformer-based architecture to enhance visual pattern recognition performance.
- [Certificate](#)

Technical Skills

Languages and Frameworks: C, Java, JS, Python, HTML, CSS, Node.js.

Other Skills: Data Structures and Algorithms, Object Oriented Programming, Machine Learning, Deep Learning, AI, Web Development.

Projects

AI Powered Nutrition Analyzer for Fitness Enthusiasts

- Developed an AI-based Nutrition Analyzer to identify food items from images and estimate nutritional content, enabling automated diet tracking for fitness users.
- Utilized MobileNetV2/VGG16 with transfer learning and applied data preprocessing and model optimization techniques to improve recognition accuracy and performance.

Agentic AI Travel Planner

- Developed it using LangGraph and Streamlit, orchestrating multiple AI agents for itinerary generation, weather analysis, attraction discovery, budget planning and personalized travel recommendations with persistent user memory.
- Integrated real-time APIs (Geoapify and OpenWeather) to provide live hotel, restaurant and attraction recommendations with Google Maps links, along with a smart budget allocation system based on destination and user preferences.

RoadGuardian – Empowering citizens through Real-Time Civic Reporting

- Developed a web-based civic hazard reporting platform using HTML, CSS, JS and Node.js enabling citizens to upload road issue images and track complaint status in real time.
- Implemented backend complaint management and status update features using Node.js, improving transparency and communication between citizens and municipal authorities.

Online Courses and Certifications

- Successfully completed Artificial Intelligence with Python training conducted by [Coincent](#).
- Completed a training program conducted by [SmartBridge](#), gaining practical exposure to industry-oriented technical skills and project-based learning.
- Certified by [SmartBridge](#) for successful completion of a project-based program demonstrating practical application of technical skills and hands-on development experience.

Achievements

- Solved data structures and algorithm problems on [GeeksforGeeks](#), improving logical thinking and coding efficiency.
- Solved data structures and algorithm problems on [LeetCode](#), improving problem solving skills.
